

Find our **FREE** screening events at [www.facebook.com/MtnStatesEarlyHeadStart](http://www.facebook.com/MtnStatesEarlyHeadStart)

Healthy eyes and good vision play a critical role in how infants and children learn to see.

It is important to detect any problems early to ensure babies have the opportunity to develop the visual abilities they need to grow and learn.

## Vision Screening

Screening by age 3 is associated with a

**70%** lower prevalence of amblyopia (lazy eye) after treatment

Annually Early Head Start screens enrolled children using the Spot Vision Screener if an evidence-based screening has not been completed.

We provide free Community Screenings in Bonner, Shoshone and Kootenai counties.
